# Learn best practice in gender-inclusive policy design and build a pipeline of women leaders

## What it is

---

This multi-week, blended learning program equips senior officials and high-potential women leaders from central banks and other regulatory agencies in emerging markets with the skills to create an enabling environment for women's financial inclusion and advance gender diverse leaders within their institutions.

## What it involves

---

Each senior official selects a high-potential woman leader from their institution to join them in the program. Each institutional pair will work together to identify, design and implement a policy to advance women's financial inclusion.\* The senior official will also receive guidance on how to invest in the woman leader's professional growth through career mentorship and sponsorship. Senior officials will receive four executive coaching sessions.

Through classroom sessions, facilitated peer learning and 1:1 advising, participants develop:

- **Leadership Skills:** Core skills such as stakeholder management, negotiation, persuasion and scenario mapping.
- **Financial Inclusion Knowledge:** Understanding of global challenges and best practices in gender-inclusive policy design.

*\*A gender-inclusive policy could be a new or updated legislation or regulation, an initiative, a program, a strategy, or a policy note.*
